SafeRoad AI

Smart Road Accident Prevention & Safety System

1. **Problem Statement**

Road accidents are a major cause of injuries and loss of life.

Accidents often happen because of overspeeding, poor visibility, unsafe roads, and driver mistakes.

Identifying accident-prone locations manually is difficult and time-consuming.

Authorities need accurate data to identify risky roads and prevent future accidents.

2. **Our Solution**

SafeRoad AI uses AI, GPS, road-condition data, and accident history to identify accident-prone areas and provide safety alerts.

Data Collection → AI Analysis → Risk Detection → Alert → Accident Prevention

3**. Who Will Use It?**

Government & Traffic Authorities

Police Departments

Highway Management Teams

Drivers & Delivery Services

Smart City Teams

Individual Road Users

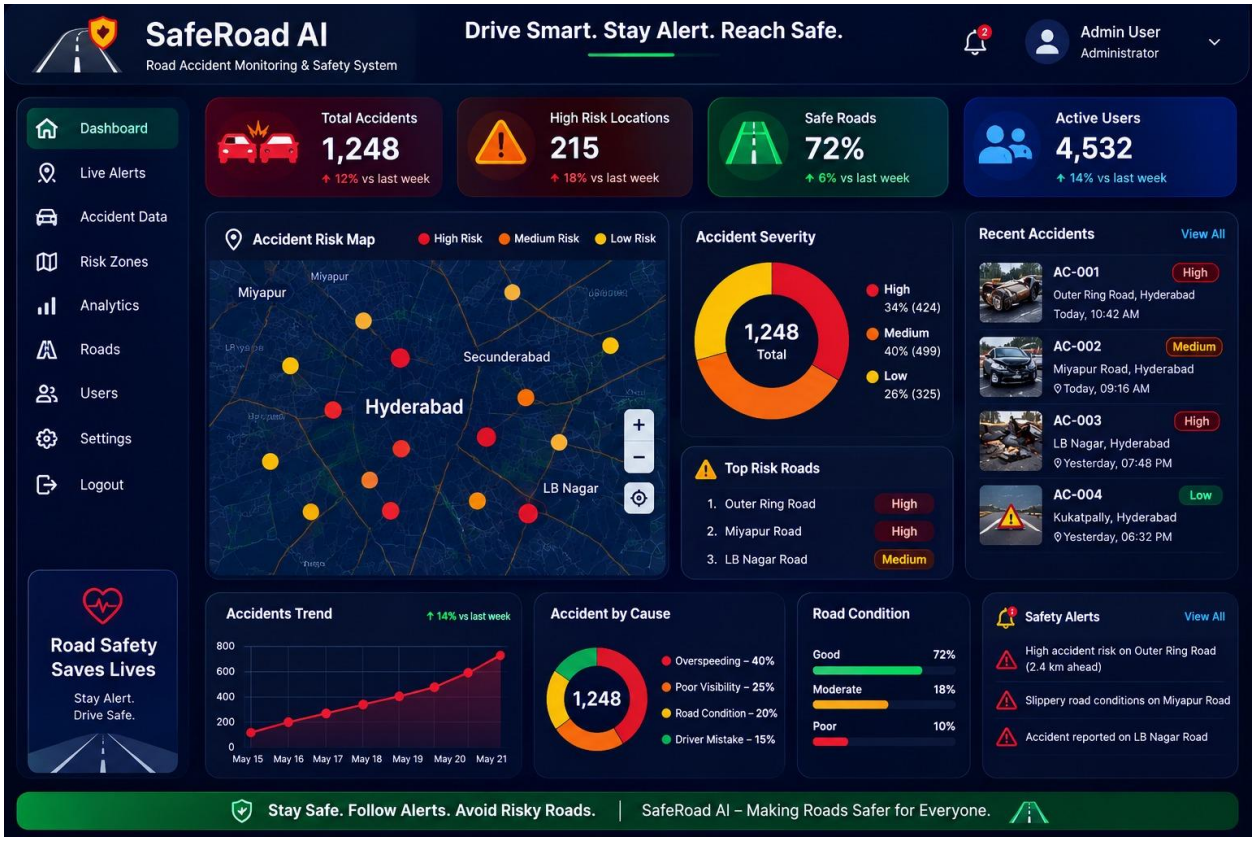

5. **User Message + Dashboard**

Welcome Message:

“Drive Smart. Stay Alert. Reach Safe.”

SafeRoad AI warns users about high-risk road locations, accident-prone areas, and dangerous road conditions.
